

Outcomes Statement

1st January 2022 to 31st December 2022

RISK WARNING: It is important to remember that making investments in business P2P loans, is not risk free and your Capital is at Risk. Past performance is not an indicator, or guarantee of future performance. These investments are not covered Financial Services Compensation Scheme. Please ensure you only invest funds that you can afford to lose, if there is a default.

To help Lenders better understand how their investments are performing (in addition to all the data provided on their dashboard) the Financial Conduct Authority have made it a regulatory requirement for P2P firms to publish an 'Outcomes Statement'. This legislation came into effect in Dec 9th 2019 and this report covers from 1st January 2022, to December 31st 2022. The next report will be after our year end, December 2023.

ArchOver does not operate any form of 'investment accounts'. All investment were made by the Lenders into loans that they chose, where the interest rate was set the same for each loan type. There were secured loans and advance loans, more details are published on our website.

The only exception is the Investment Plan, where lenders could commit funds upfront that were then automatically, evenly distributed over the next 10 secured loans that appeared on the ArchOver platform. There were **no new Investment Plans** in the reporting period.

Default Rates in the Period

Lending to businesses carries risk, all Lenders should refer to our Risk Warning before investing. There are two key stages that investors need to be aware of:

- **Default**, where ArchOver has started recovery proceedings against a Borrower (the business is in administration)
- **Loss**. Losses will depend on the ‘outcomes’ of our recovery team in pursuing the available security, take action against directors, or a number of other recovery activities – this can take time and is reported at the end of recovery

ArchOver is a partner firm with Escalate Law. This allows us as Trustee, on behalf of Lenders, to have access to a fully funded legal services with After the Event Insurance (ATE) to pursue claims all the way into the High Court if needs be. This can mean recoveries take a while, but we believe this is a better approach than simply writing off a default, because of recovery cost concerns.
